

Baker AWA-IV

12 Kv Tester

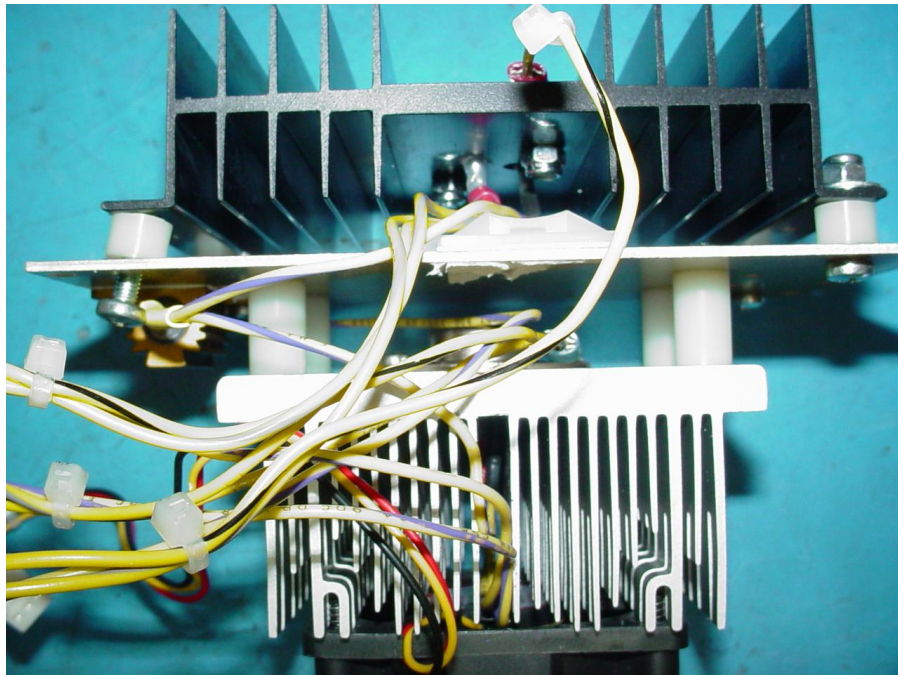

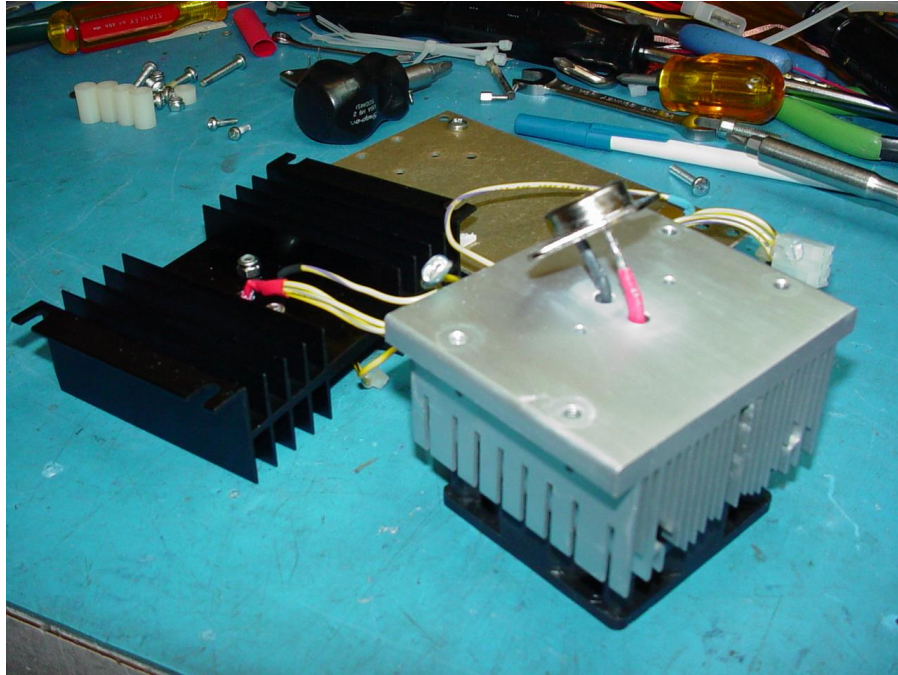

In 2006 I started to upgrade some of the AWA-IV with a new SBC and Windows XP Professional Operating System.

## AWA-IV With new AAEON PC-104 Motherboard

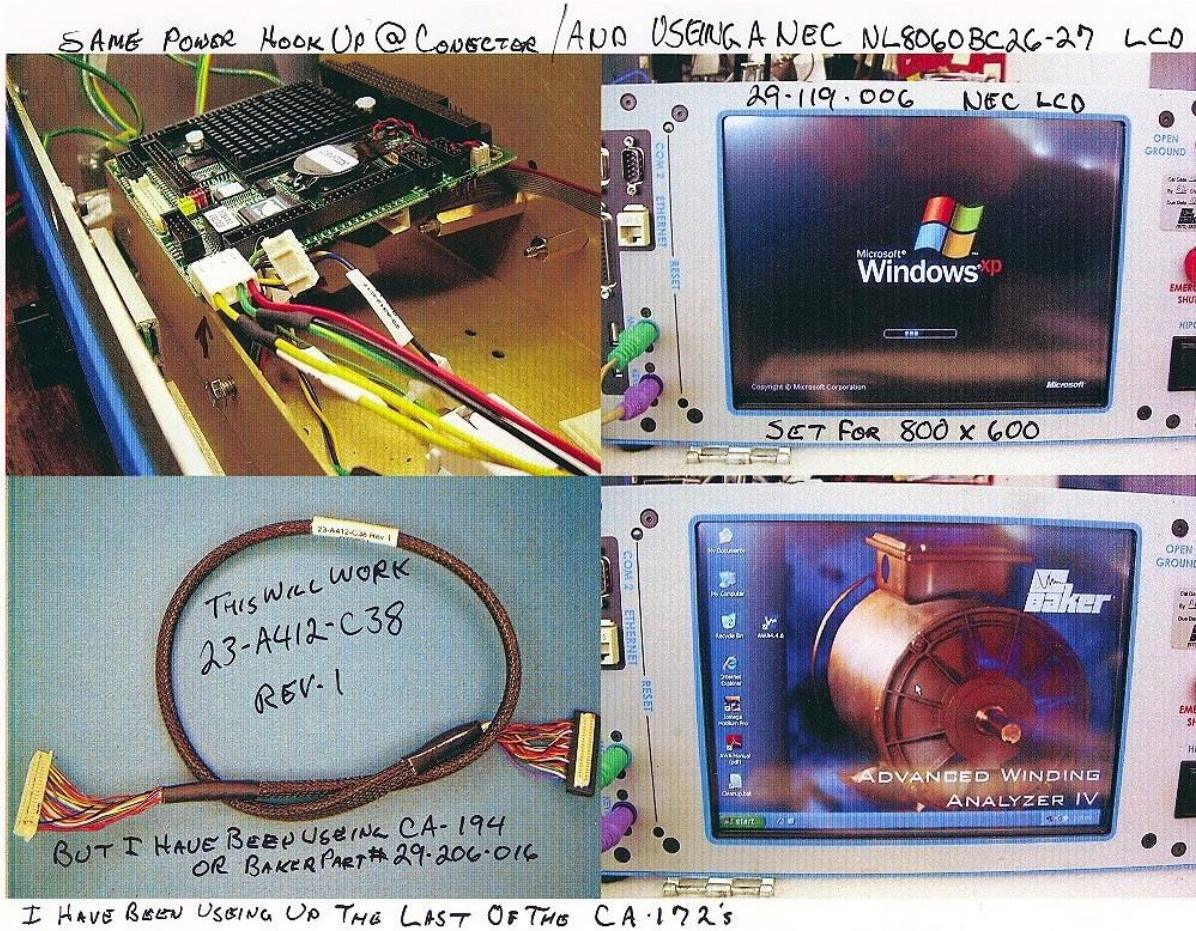

This upgrade involved a re-design of the power supply, pre-parallels and driver support for the PC-104 buss to communicate with the existing control boards.

New hardware upgrades

Also installed a new Hi resolution LCD Display

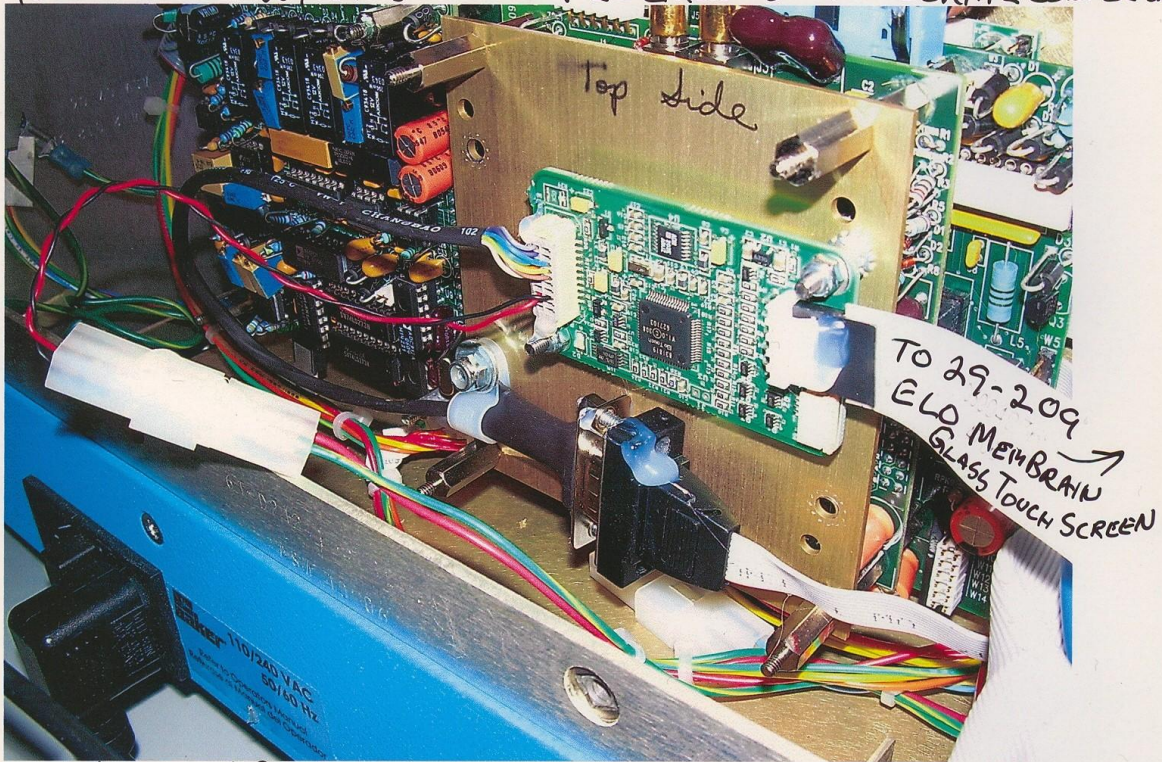

This new TFT LCD Display had to be reconfigured for the larger DOT Pitch.

Reconfigure the COM Port to run the new Touch Screen.

NEW ELO 29-208 WILL PLUG INTO THE SERIAL CONNECTOR

WITH 29-210 ELO CONNECTOR
