Re: Reference letter for Mr. Brian Huelat.

Dear Sir or Madam:

It is with great pleasure that I recommend Brian Huelat. I have known Brian for over 5 years. The last 2½ years, through July 2011, was spent as Brian's direct technical supervisor, at Baker Instrument Company. (4812 McMurry Ave, Fort Collins, Colorado, USA, www.bakerinst.com)

Brian always displayed a high degree of integrity, responsibility, and, *especially* ambition for debugging PC issues. He is definitely a leader rather than a follower.

In my 20 years in industry, I cannot recall working with a more knowledgeable, and determined computer repair technician. His debugging and deployment skills were able to solve many PC, Computer, Operating System and Microprocessor control issues for us at Baker Instrument Company. This was in addition to his electronic repair and calibration duties, which he performed with satisfaction.

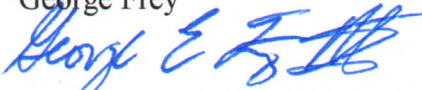

He always went the extra mile in regards to his PC work, looking for innovative ways to help our customers, and provide solutions for them.

Brian would be an asset to any organization, and I am happy to give him my wholehearted endorsement.

You are free to contact me by phone or email if you would like.

Sincerely,

George Frey
